THE AGED LEAD OPERATOR'S WORKBOOK

The Mortgage Edition

10 worksheets to turn the playbook into your own operating plan. Fill them in, keep them, revisit quarterly.

Work Aged Leads · workagedleads.com
Not legal advice · Consult TCPA-literate counsel before running outreach

This is the Mortgage Edition workbook. Complete it alongside your **Aged Lead Operator's System — Mortgage Edition** playbook. Answers here become your operating documents — keep them in a binder or a shared drive and revisit quarterly.

The Aged Lead Operator's Workbook

Companion to The Aged Lead Operator's System. Do these 10 worksheets in order — you'll finish in about 90 minutes.

How to use this workbook

Each worksheet pairs with a specific part of the playbook. Fill each one out by hand (print or PDF form fields) — the act of writing each number and decision forces clarity that reading doesn't. These worksheets become your operating documents. Stash them in a binder or a Google Drive folder and reference them quarterly.

Order matters. Worksheets 1–3 decide whether you should even run aged leads. 4–6 design your operation. 7–9 run it. 10 audits it. Don't skip ahead.

Worksheet 1 — Unit Economics

Pairs with Playbook Part II.

Fill in your real numbers. Do not guess optimistic.

Your baseline

Product / vertical: _____

Average Revenue Per Close (ARPC): $ _____

(Use the average of your last 10 closed deals, not your best one. If you're new, use the conservative low end of your expected commission schedule.)

Your target return on lead spend: □ 3× □ 4× □ 5× □ Break-even

Your realistic performance assumptions

If you've run aged leads before, use your last 90-day averages. If you haven't, use the conservative estimates noted:

Contact rate (new operator default: 12%): _____ %

Contact-to-close rate (new operator default: 2%): _____ %

Your computed max CPL

```
Max CPL = ARPC × (1 / target return) × Contact rate × Contact-to-close

        = $ ________ × (1 / ________ ) × ________ × ________

Max CPL = $ ________
```

Your pre-purchase checklist

- [ ] My max CPL is above the typical aged-lead price in my vertical (check playbook benchmarks)
- [ ] My ARPC assumption is based on actual closes, not hopes

- [ ] I can fund at least 3 months of lead spend to properly evaluate a source

If max CPL is lower than vertical benchmarks: your economics don't work with aged leads *yet*. You need to raise ARPC, improve contact rate, or improve close rate before buying. Revisit this worksheet in 90 days.

Worksheet 2 — Tech Stack Decision

Pairs with Playbook Part III.

Where you are today

Current monthly lead volume (all sources): _____ leads

Number of full-time sellers on your team: _____ reps

Current monthly gross profit from aged-lead activity: $ _____

Your tier recommendation

Based on your numbers:

- Under 500 leads/mo and under $5K gross profit → **Setup A (No-tech)**
- 500–5,000 leads/mo and $5K–$30K gross profit → **Setup B (Light-tech)**
- 5,000+ leads/mo and 3+ full-time reps → **Setup C (Full-tech)**

My tier: □ A □ B □ C

Your 90-day upgrade trigger

Define the one metric that tells you to upgrade tier:

"I will move to the next tier when _____

_____ for 2 consecutive months."

(Good triggers: "I miss 20%+ of my planned follow-ups because I lose track" or "my team hits 4 full-time reps" or "my monthly gross profit exceeds $30K.")

Your stack

List the specific tools you're committing to, at your current tier:

Function	Tool	Monthly cost
Dialer	_____	$ _____
SMS	_____	$ _____
Email	_____	$ _____
CRM	_____	$ _____
DNC scrub	_____	$ _____
Total		**$ _____**

Worksheet 3 — Source Scorecard

Pairs with Playbook Parts II–III.

Rate each current (or candidate) aged-lead source on 6 dimensions. Score each 1–5.

Source: _____

Dimension	Score (1–5)	Notes
Price vs. benchmark (cheaper = higher score only if quality holds up)		
Data accuracy (correct phone, correct email, bounce rate)		
Consent record quality (TCPA-compliant, SMS-eligible, named-buyer)		
Vertical/demographic match to your product		
Suppression support (publisher honors your opt-outs)		
Responsiveness (your rep replies within a day when you ask questions)		
Total (out of 30)		

Decision rules

- **25–30:** primary source, scale up
- **20–24:** secondary, run parallel tests
- **15–19:** marginal, run only if primary is out of stock
- **Below 15:** drop

Your source ranking

Rank	Source	Score	Monthly volume
1	_____	__/30	_____
2	_____	__/30	_____
3	_____	__/30	_____

Maintain this ranking and update it monthly. Sources decay — what was 28 last quarter can be 19 this quarter.

Worksheet 4 — Tech Stack Budget vs. Margin

Pairs with Playbook Part III.

Monthly P&L (projected)

Revenue side:

Item	Amount
Aged lead volume (per month)	_____ leads
Cost per lead	$ _____
Total lead spend	$ _____
Expected contact rate	_____ %
Expected contacts per month	_____
Expected contact-to-close	_____ %
Expected closes per month	_____
ARPC	$ _____
Total expected revenue	$ _____

Cost side:

Item	Amount
Lead spend (from above)	$ _____
Tech stack (from Worksheet 2)	$ _____
Labor (reps × salary or commission share)	$ _____
Other (DNC scrub, insurance, misc)	$ _____
Total cost	$ _____

Monthly gross margin: $ _____ (revenue – cost)

Margin as % of revenue: _____ %

Decision rules

- Gross margin under 20%: you're at risk. Reduce tech cost, increase ARPC, or pause.
- Gross margin 20–40%: healthy range, focus on scaling.
- Gross margin over 40%: scale aggressively — you have room to outbid competitors on the next lead source.

Worksheet 5 — Script Customization

Pairs with Playbook Part IV.

Fill in your personalized versions of the 3 most important scripts. Rehearse each out loud before your first day of dialing.

Script A1 (First-touch call, live pickup)

Opener:

> "Hey [Name], this is _____ with _____. About _____ [time period] back you asked about _____, is that still something you're exploring, or did you get that handled already?"

Your key clarification question (if they say "still looking"):

> "Quick question: _____

> _____?"

Script A2 (First-touch voicemail)

> "Hey [Name] — _____ with _____. Calling about the _____ thing you looked at a couple months back. Wanted to see if you still needed help or if you're all set. Give me a ring back at _____ or I'll try you in a couple days."

Script S2 (Value-first SMS)

Your vertical's one-sentence value point:

Full SMS:

> "Hey [Name] — _____ with _____ — quick thing on _____: [value point from above]. If useful, happy to walk through in a 5-min call. Reply STOP to opt out."

Rehearsal check

- [ ] I've said each script out loud 5 times
- [ ] I can deliver each without reading (for the calls)
- [ ] My SMS is under 160 characters (check)
- [ ] My voicemail is under 20 seconds when spoken at natural pace

---

Worksheet 6 — 30-Day Cadence Planner

Pairs with Playbook Parts IV & V.

For each lead received on Day 0, map exactly what happens and when. Fill in the first 30 days for a representative batch.

Day	Action	Channel	Script	Status (pending/done/skipped)
0	Scrub + tag	—	—	
1	Call #1 (AM)	Phone	A1	
1	Voicemail (if no pickup)	Phone	A2	
1	SMS #1	SMS	S1	
2	Email #1	Email	E1	
3	Call #2 (PM)	Phone	A3	
3	SMS #2	SMS	S2	
5	Call #3 (Evening)	Phone	A3	
5	Email #2	Email	E2	
7	Call #4 (AM)	Phone	A4	
7	SMS #3 (break-up)	SMS	S3	
10	Email #3 (break-up)	Email	E3	
14	Call #5 (final)	Phone	A4	
14	Move to nurture bucket	—	—	
16	Nurture touch 1	Per bucket	—	
23	Nurture touch 2	Per bucket	—	
30	Nurture touch 3	Per bucket	—	

Time blocking

How many hours per day will you spend on each stage of the funnel?

Activity	Hours/day
Lead ingest / scrub	_____
Opener outreach (Days 1–14)	_____
Nurture outreach (Day 15+)	_____
Closes / applications / quotes	_____
Admin (CRM update, sheet hygiene)	_____
Total	_____

Worksheet 7 — Pipeline Math

Pairs with Playbook Parts II & IV.

Given your monthly lead purchase, compute expected pipeline stage-by-stage. This is your forecast — check actuals against it every 2 weeks.

Inputs

Metric	Value
Monthly lead purchase	_____ leads
Contact rate	_____ %
Contact-to-appointment (or contact-to-qualified-conversation)	_____ %
Appt-to-close	_____ %
Average sales cycle (days from contact to close)	_____ days

Outputs

Stage	Expected volume
New leads acquired	_____
Contacts	_____ (leads × contact rate)
Appointments / QCs	_____ (contacts × appt rate)
Closes	_____ (appts × close rate)

ARPC x closes = monthly revenue

$ _____ × _____ closes = $ _____ monthly revenue

Tracking

Every 2 weeks, compare actuals to this forecast. Fill in:

Week	Actual contacts	Actual appts	Actual closes	Gap
Weeks 1–2				
Weeks 3–4				
Weeks 5–6				
Weeks 7–8				

If you miss contact rate for 2 straight periods: problem is in lead source quality or cadence execution. If you hit contact but miss appt: problem is scripts or close rep.

Worksheet 8 — Compliance Self-Audit

Pairs with Playbook Part VI. Run this monthly.

Audit period: _____ to _____

Auditor (you): _____

Operating mode (circle one)

□ **Mode A — Conservative.** Manual dial only. SMS only to fresh-consent records. No RVM, no predictive/parallel dialing.

□ **Mode B — Operator Standard.** Preview dial only. SMS only to records with fresh or verified PEWC. 10DLC + quarterly counsel review.

If your mode is C (predictive/parallel on aged consent, RVM at scale, SMS without verified consent) — stop. Rebuild your consent workflow before running more outreach. Call Henson Legal.

Counsel on call

TCPA attorney: _____

(Recommended: Henson Legal**)**

Date of last counsel review: _____

1. DNC scrubbing

- ☐ I have an invoice/receipt for DNC scrubbing for every list purchased this month
- ☐ Every list got scrubbed before any outreach fired
- ☐ State-specific DNCs were scrubbed for any state requiring them (FL, TX, OK, WA, MD in particular)
- ☐ My internal suppression list was appended

Gaps found: _____

2. Consent documentation

Random-sample 10 leads from this month. For each, confirm:

Lead #	Original form on file?	Consent language on file?	Timestamp/IP on file?	Publisher ID on file?
1	☐	☐	☐	☐
2	☐	☐	☐	☐
3	☐	☐	☐	☐
4	☐	☐	☐	☐
5	☐	☐	☐	☐
6	☐	☐	☐	☐
7	☐	☐	☐	☐
8	☐	☐	☐	☐
9	☐	☐	☐	☐
10	☐	☐	☐	☐

Gaps found: _____

3. SMS compliance

- [ ] All sending numbers are 10DLC-registered
- [ ] Every SMS first-touch includes "Reply STOP to opt out"
- [ ] Opt-outs from this month were processed within 24 hours (list them)
- [ ] SMS sends only occurred between 8 AM and 9 PM prospect local time

Opt-outs received this period: _____ (number)

Any sent after opt-out logged?: ☐ No ☐ Yes (document in gaps below)

4. Call time windows

- [ ] All dial attempts this month fell within 8 AM–9 PM prospect local time

- ☐ Prospect time zone was verified by area code (or address) for out-of-state calls

Gaps found: _____

5. Autodialer / RVM risk review

- ☐ If I use an autodialer, the consent record for every contacted cell phone explicitly names my company
- ☐ If I drop RVMs, I have documented consent for each recipient
- ☐ If neither applies, I confirm I use preview/manual dial only

6. Fresh-Consent Ladder progress

Track how many fresh-consent records you added this period (via Plays 1–6 in Part IV of the playbook):

Play	Active? (Y/N)	New fresh-consent records this month
Play 1 — Callback-page opt-in		
Play 2 — Text-to-join keyword		
Play 3 — Qualifying-call consent ask		
Play 4 — Quote/estimate checkbox		
Play 5 — Nurture re-engagement button		
Play 6 — Incentive opt-in		
Total fresh-consent records added		

% of active database on fresh consent: _____%

Target: 30% fresh consent by month 3, 60% by month 6, 80%+ by month 12.

Overall compliance score: _____ / 6 sections passed

Remediation due by: _____ (date)

Worksheet 9 — 90-Day Operator Plan

Pairs with Playbook Part I (mindset) and Part VII (diagnostic).

30-Day goals

Goal	Metric	Target	Actual
Goal 1	_____	_____	_____
Goal 2	_____	_____	_____
Goal 3	_____	_____	_____

60-Day goals

Goal	Metric	Target	Actual
Goal 1	_____	_____	_____
Goal 2	_____	_____	_____

90-Day goals

Goal	Metric	Target	Actual
Goal 1	_____	_____	_____
Goal 2	_____	_____	_____

Quarterly themes

Pick the one theme that will define the quarter:

- ☐ **Volume** — I will double lead purchases and keep contact/close rate flat
- ☐ **Contact rate** — I will improve contact rate by 3+ percentage points through better cadence

- [ ] **Close rate** — I will improve close rate by 2+ percentage points through better scripts + qualification
- [ ] **Nurture** — I will close 3+ deals from leads older than 90 days
- [ ] **Compliance** — I will pass a monthly audit with zero gaps for 3 straight months

One thing you will stop doing this quarter

(Most operators get better by removing one bad habit, not adding one good one.)

Worksheet 10 — The 90-Day Operator Diagnostic

Pairs with Playbook Part VII. Score 0–4 on each of the 25 questions. Total out of 100.

Dimension 1: Unit economics (20 points)

#	Question	Score
1	I know my current ARPC within $50 of accuracy.	__
2	I know my current contact rate per lead source.	__
3	I know my current contact-to-close rate.	__
4	I compute my max viable CPL before every lead purchase.	__
5	I review my unit economics at least monthly.	__
	Dimension 1 total	__/20

Dimension 2: Operation setup (20 points)

#	Question	Score
6	I have a defined tech stack matched to my volume.	__
7	I have named the 5 operational roles and know who owns each.	__
8	I have a documented lead-intake process (scrub, segment, tag).	__
9	I have a CRM or sheet that tracks every touch with every lead.	__
10	I know what my bottleneck is right now.	__
	Dimension 2 total	__/20

Dimension 3: Outreach discipline (20 points)

#	Question	Score
11	I run a defined multi-channel 14-day opener cadence.	__
12	My scripts are written down and refreshed quarterly.	__
13	I log every touch with outcome.	__
14	I vary call times and days to improve contact rate.	__
15	My break-up touches are as intentional as my first touches.	__
	Dimension 3 total	__/20

Dimension 4: Nurture (20 points)

#	Question	Score
16	I have a 30/60/90/180/365-day nurture calendar.	__
17	I classify every non-closed lead into Warm/Cold/Dormant.	__
18	I have a library of 6+ nurture content pieces I rotate through.	__
19	I track re-engagement rate on nurture touches.	__
20	I have closed at least one deal from a 90+ day old lead in the last quarter.	__
	Dimension 4 total	__/20

Dimension 5: Compliance (20 points)

#	Question	Score
21	I scrub every list against DNC before outreach.	__
22	I have consent documentation archived for every lead in my system.	__
23	My SMS operation is 10DLC-registered with opt-out on every message.	__
24	I honor opt-outs within 24 hours across all channels.	__
25	I run a monthly compliance audit and document it.	__
	Dimension 5 total	__/20

Grand total

Your score: _____ / 100

Score	Assessment
85–100	Operator level. Focus on marginal optimization.
65–84	Solid. Fix your lowest-scoring dimension.
40–64	Leaking. Pick 2 dimensions and fix this quarter.
Below 40	Stop buying leads. Install basics first.

Your 2 lowest dimensions

1. _____ (score: __/20)
2. _____ (score: __/20)

Your next move

Based on your lowest dimensions, what is the **one** change you will make this week to start fixing them?

You're done.

If you filled every worksheet in this book honestly, you know more about your aged-lead operation than 90% of operators in your vertical. Now go run it — and come back to these worksheets every quarter. Your answers will change as the operation matures. That's the point.

— Bill

Return to the playbook whenever you need the scripts or the cadence. The workbook is your operating record.
